Front-end Developer Student

EXPERIENCE

Kitchen Senior / Team leader

Vegan Junk Food Bar, Amsterdam

Apr 2022 - May 2023, 1 yr 2 mos

After a long time being with the company, promoted to Kitchen Senior. Mostly because I was already doing most tasks and had responsibilities of a Senior. Getting the title and having an opportunity to grow just seemed natural to me.

Amsterdam

Kitchen Staff

Vegan Junk Food Bar, Amsterdam

Oct 2019 - Apr 2022, 2 yrs 7 mos

Wanted a change from a supermarket environment. Felt like it was more a job for teenagers starting with their first jobs. On a recommendation from a friend, I applied to a company that seemed 'modern' and more targeted to my age group.

Junior Developer (Internship)

Mirabeau, Amsterdam

Feb 2019 - Jun 2019, 5 mos

This was my graduation internship. Amazing company with a lot of professional en helpful people. Here, I worked in a team with other interns that were doing HBO at that time whilst I was still doing MBO, so there was a gap in knowledge, but it gave me a lot of sources to learn from. I got to learn how to work with API's.

QA Tester (Internship)

24i, Amsterdam

Sep 2017 - Jan 2018, 5 mos

First internship. My tasks consisted of testing the quality of streaming platforms, making reports and fixing any bugs found. This didn't really match the course I was following at the time, but it did give me a good picture of how working in a company went.

EDUCATION

Communication Multimedia Design

Hogeschool van Amsterdam (HvA), Amsterdam

Aug 2020 - PRESENT

After the disaster of my previous course, I wanted to pick something that I enjoyed without needing others to give motivation. That brings me to this course. A broad course with a lot of options and job opportunities. I wish to develop myself more into web development (mostly front-end).

Computer Software Engineering

Hogeschool van Amsterdam (HvA), Amsterdam

Aug 2018 - Mar 2019

A course I didn't finish. This is because I felt like the teachers weren't there to give proper guidance/assistance. With unprofessional and often lazy teachers, it felt like a bad learning environment and I lost my motivation pretty quickly and went to pursue something else.

Application Development

ROC van Amsterdam, Amsterdam

Aug 2016 - Jul 2018

I knew pretty quickly that I wanted to do something with computers and coding. Building websites and apps, using your creativity to come up with solutions to problems, is just something that spoke to me. The best pick for this goal was this course.

VMBO-t

Bredero Mavo, Amsterdam

Aug 2015 - Jul 2016

HAVO

De Nieuwe Havo, Amsterdam

Aug 2011 - Jul 2015
